-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I in the reply filed on 6/23/2006 is acknowledged. The traversal is on the ground(s) that a search for either the apparatus or the method would likely encompass a search for both. This is not found persuasive because the method is extremely broad and can be performed by many different structures and would therefore require a search in many different classes and subclasses that would not be required for the apparatus.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-10, 14-24, 26-27, 33-36, 38-44, 46-50, 53-55, and 65-75 are rejected under 35 U.S.C. 102(b) as being anticipated by Doyle (6,290,206). Doyle discloses an adaptor (4) that can be used with a urinary catheter having a normally closed valve, the adaptor comprising a fluid tube (10) to sealingly engage the discharge end of the catheter and an internal diameter sized for fluid flow therethrough, and a member (14) associated with the fluid tube and having an external dimension sized to allow fluid to flow around, the member adapted to engage the closed valve and keep the valve open while the fluid tube is sealingly engaged with the discharge end, wherein the

Art Unit: 3763

discharge end is tubular, further comprising a releasable clip (76) adapted to pinch and secure the fluid tube to the discharge end, wherein the member is a solid rod-shaped member, and further comprising a protuberance (12) positioned to butt up against a portion of the urinary catheter when the member engages the downstream side of the valve thereby preventing the member from being further inserted into the valve, wherein the protuberance is located on the releasable clip, wherein the member is sized to pass through the valve (20) and extends beyond the fluid tube.

Claims 1-6, 8-10, 14, 16-23, 25-27, 33-35, 37-43, 45-50, 53-55, and 65-75 are rejected under 35 U.S.C. 102(b) as being anticipated by Mathieu (4,745,950). Mathieu discloses an adaptor (6) that can be used with a urinary catheter having a normally closed valve (58), the adaptor comprising a fluid tube (21) to sealingly engage the discharge end of the catheter and an internal diameter sized for fluid flow therethrough, and a member (28) associated with the fluid tube and having an external dimension sized to allow fluid to flow around, the member adapted to engage the closed valve and keep the valve open while the fluid tube is sealingly engaged with the discharge end, wherein the discharge end is tubular, further comprising a releasable clip (46) adapted to pinch and secure the fluid tube to the discharge end, wherein the member is a hollow, rod-shaped member, and further comprising a protuberance (44) positioned to butt up against a portion of the urinary catheter when the member engages the downstream side of the valve thereby preventing the member from being further inserted into the valve, wherein the protuberance is located on the releasable clip, wherein the member is sized to pass through the valve (58) and extends beyond the fluid tube.

Allowable Subject Matter

Claims 11-13, 28-32, 51-52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 56-64 are allowed.
